### Our Curricular Model

Finding solutions to complex problems requires curiosity, empathy, and ingenuity. At Langley, **inquiry-based learning** engages our students in discovery, exploration, and guided practice, developing strong core academic skills, conceptual understanding, and critical thinking. **Social-emotional learning** develops our students' emotional intelligence, cultural responsiveness, health and wellness, and resilience. Together, these complementary components of our curriculum promote intellectual flexibility, perspective-taking, interdisciplinary and interpersonal connection, collaboration, and innovation.
